Subject: pavillion water hauling info and water quality

Rob,

(FYI from a guy in the lander valley on water quality and water hauling after seeing the article in the Casper Star indicating a \$250 monthly fee for water.)

I get my water from Lander and Dry Mountain Water hauls it. I am 8 1/2 miles out of lander. His fee to me is \$95 per 5000. 5000 lasts me, my wife and daughter (3) for four weeks. I could haul it myself from lander's fill station for \$7 plus my time plus my gas, but I don't because I am lazy!

I think the guy in Lander (I have him haul my water) is just trying to make some cash!

Pavillion could make some money for their coffers here, i would think! \$250 is BS, though!

The guy in Lander already has too many customers, so his price is high because he can't do it! The haulers in Riverton are also starting to haul to Lander because the lander guy has too many customers.

Pavillion folks are acting like they are the only ones in the world with bad wells. Half the rural county is on cisterns because the groundwater is no good. There are enough current cisterns in Fremont to support four water hauling companies right now, SUO and three private -for profits!

(SUO is the Shoshone Utility Organization I believe)
